Suggested Reading List

Recommended Reading for Part One and Part Two Examination

This reading list contains books that may be useful study material for the European Board of Paediatric Surgery Examinations, Part One and Part Two.

Naturally, these books are of no use without a thorough training and depth of experienced of patient care that occurs over years of working under expert supervision. In particular it is only with experience the paediatric surgeon can know what to do when patients insist on not following the course prescribed by the erudite descriptions in the text!

An important point to remember that books are always out of date; the pace of change is so rapid that by the time the book has come to publication things may have already moved on. Nowhere is this more relevant than paediatric surgery.

This means that reading books must be supplemented by regularly attending meetings and communicating with other paediatric surgeons to see what is current practice. EUPSA is a great example of this, and takes place every year in various European Cities: {<https://www.eupsa.info>}

The Part One Examination contains 120 take from the following categories:

4. CLINICAL DATA INTERPRETATION
5. RADIOLOGICAL AND IMAGING INVESTIGATIONS
6. GENERAL PAEDIATRIC SURGERY
7. PAEDIATRIC ONCOLOGY
8. NEONATAL SURGERY
9. GENITO URINARY SURGERY
10. PAEDIATRIC TRAUMA AND BURN CARE
11. PAEDIATRIC CRITICAL CARE
